SUMMARY

Product-minded software engineer experienced in end-to-end application lifecycle management, delivering user-focused improvements and measurable business impact. Skilled in data-driven decision-making, user journey analysis, and Agile execution to build scalable, user-centric solutions.

EDUCATION

BTech in Information Technology

Institute of Engineering and Technology(IET), Lucknow

Aug '19 - Jun '23

EXPERIENCE

Software Engineer

Volkswagen Group Digital Solutions

Nov '23 - Till Date

- Owned end-to-end application lifecycle (onboarding to retirement), driving reliability and continuous product improvements
- Collaborated with clients and cross-functional teams to prioritize high-impact issues, reducing recurring user pain points and improving system stability
- Led adoption of Agile practices (stand-ups, sprint planning, retrospectives), improving team alignment and delivery efficiency
- Designed and built an automated activity tracker using PowerApps & Power Automate, increasing team productivity and visibility by ~30%
- Leveraged AWS services to manage scalable application infrastructure, ensuring high availability and performance
- Analyzed 100+ recurring application support tickets to identify patterns in user and system issues, reducing resolution time by 30% and increasing customer satisfaction by 20%

SDE Intern

Prime Video Payments, Amazon IN

Jan '23 - Jun '23

- Analyzed payment flows and customer support trends across 10+ regions to identify gaps in billing clarity, and improved transaction descriptors—reducing billing disputes by 30%
- Enhanced bank statement descriptions to improve user understanding, leading to a 20% reduction in customer support queries and improved user experience
- Migrated a critical payment service to a secure AWS environment, reducing latency by 20% and improving system performance and reliability

PROJECTS

Stack Overflow Clone (MERN Stack)

- Built a Q&A platform to enable seamless knowledge sharing, focusing on improving user engagement and interaction
- Designed intuitive user flows for asking, answering, and managing content, enhancing overall user experience
- Implemented core features that increased user engagement by 50%, driven by efficient design and usability improvements

SKILLS

- **Product & Analytical:** Data-Driven Decision Making | User Journey Analysis | Experimentation | KPI Tracking | Root Cause Analysis | Agile Methodologies | Cross-Functional Collaboration
- **Technical:** Java | JavaScript | Python | TypeScript | React | Node.js | Spring Boot
- **Tools & Platforms:** AWS | Docker | Git | Jira | Azure Boards | PowerApps | Power Automate | MySQL | MongoDB | Postman | Firebase
